

## QUALITY CERTIFICATE

*Desleeclama is pleased to certify that our quality VIOLA-C 6 FRNW J2551 is resistant to ignition with ignition sources EN597-1 and EN 597/2*

Standard: **BS 7177; 1996**

Resistant to ignition with source:

- Smouldering cigarette of BS EN 597/1; 1995
- Match flame equivalent of BS EN 597/2; 1995

These test results relate only to the ignitability of the combination of materials under the particular condition of test, they are not intended as a means of assessing the full potential fire hazard of the mattress, mattress pad or upholstered bed base in use.

### Deviations from the standard procedure

The composition of the finished mattress is not known, therefore the test specimen is made up with the cover, interliner and foam as specified beneath. The test is carried out only on the flat portion of the upper surface.

### Composition of the test specimen for BS EN 597-1 and BS EN 597-2

- the mattress ticking
- a polyester non-woven 'Thermostar' (300 g/m<sup>2</sup>)
- a fire retardant CMHR- foam, Recticel (60 kg/m<sup>3</sup>)

### Conditioning

- test carried out in not conditioned circumstances
